

**DRAFT
WRC-03 ADVISORY COMMITTEE**

IWG-5

Meeting Minutes

Meeting: Fifth Meeting of IWG-5

Date/Time: November 14, 2001, 2:00 pm

Location: PanAmSat, 1133 Connecticut Avenue, 6th Floor, Washington, D.C.

Committee Members Present: D. Jansky, Chairperson, D. Bethea, Vice-chair

FCC Employees Present: A. Roytblat, John Martin

Meeting Summary: Author: Don Jansky

Introduction of Participants:

All participants introduced themselves, including a number of participants on a conference bridge.

The minutes of the 4th meeting were tabled.

The chair explained that the agenda would address the status of two different agenda items in IWG-5, 1.5 and 1.24.

Agenda 1.24 was treated first, as it related to the work of US TG 4-7-8, which is dealing with this agenda item and met earlier in the day. It was noted that three new US contributions have been introduced to US TG 4-7-8 which address sharing between the Radiolocation and Space Research Services with the FSS. These caused considerable discussion and depending on how they evolve, would impact US proposals.

Regarding Agenda 1.5, Alex Roytblat explained why the P.V. agreed at the last meeting of IWG-5 was not adopted by NTIA/FCC. It continues to be a very difficult issue. It is expected that NTIA/FCC will continue discussions to resolve the difficulty.

The next meeting of IWG-5 is now scheduled for December 20, to again correspond with a meeting of US TG 4-7-8. However, there may be an AD HOC meeting of those concerned with agenda item 1.5 if progress is made between the FCC and NTIA.

The next meeting of CITEL-PCC-III is scheduled for February 18-21, 2002, Mexico City, the work of the IWGs is now shifting to development of proposals.

The meeting adjourned at 3:30pm.

Attendance:

J. Carroll, J. Miller, F. Weaver, G. Rappoport, D. Siddall, R. Kubik, R. Quianzon, S. Kaltenmark, T. Minnix

Conference Bridge:
